

THIS IS

T

THIS IS YOUR BUSINESS GROWTH

Yes that's a bold statement - but we have proven that a solid and robust I.T. integrated solution can power your business to the next level and gain a competitive advantage in this modern digital world.

Instead of fighting fires, being held back by breakdowns and delays, inefficient communications and processes, the dangers and risks around payments and data - Bowland IT has the expertise across the board to support and liberate your team to focus on the core activity of business.

When IT works everything flows

- People
- Profitability
- Productivity
- Performance
- Protection
- Cost efficiencies
- Communications
- Customer experience
- Culture
- Attraction and Retention of Talent
- Wellbeing

IT is all about you

We exist to support businesses and are relentless in our pursuit of excellence.

Our expertise and knowledge are delivered through a genuine, down-to-earth approach

Our promise to you

Leverage the power of IT to deliver long term growth without being held back by inefficiencies, poor performance & downtime.

IT is Trust

IT is proven

Don't take our word for it

The Printed Cup Company manufacturing facility in Clitheroe relies on fulfilling orders from around the globe, priding themselves on quotations, artworks and manufacturing scheduling within one hour of enquiry. Such is their reliance on telecoms and digital that only a robust and faultless integrated IT system will suffice.

The Printed Cup Company have been working with Bowland IT since 2019 and credits the company with staggering savings on their previous system, smooth operations and up-to-date technology and knowledge.

"Bowland IT give us peace of mind, it allows everything to work and allows the team to concentrate on the core business without stopping or being held back by IT issues or disruptions. Taking our IT externally has given continuity and savings, we are not wide open when people leave and we have a fully integrated system and support across software, hardware, data back-up, comms and cyber-security. We have access to expertise that future proofs our business - its a partnership."

Mark Woodward
Director, The Printed Cup Company

"Bowland IT and Telecoms have been with us from the very first day that we setup our company, they have played a huge part in our growth so far and continue to do so. Working with an IT and Communications company that we can rely on has enabled us to focus on driving our business forward without IT and Communication issues. Bowland IT provide our telephone system, broadband and IT support along with ongoing supply of IT hardware for our business."

Emma Hodgkinson
Managing Director, Whalley Home Improvements

"Such a game changer for our business, we use Bowland IT for our call centre services and communications. The level of support which we receive from Bowland is second to none, and their down to earth honest approach really fits in with the types of business we like to partner with. We very rarely have faults and issues, but when we do, Bowland always respond very quickly, and endeavour to fix the problem without issues. It is clear that Bowland IT and Telecoms care about their clients, it is refreshing to completely trust that Bowland have our best interests at heart"

Harvey Mason
Managing Director, EnergySmart Renewables

IT is future-proofed

Our 'Triple A System' is designed to give our clients the best onboarding experience for their business'

STAGE ANALYSE

1

The first step in our onboarding process is to analyse your current IT infrastructure, systems, and processes. Our team of experienced IT professionals will conduct a thorough assessment to gain a comprehensive understanding of your business requirements, challenges, and goals. By closely examining your existing setup, we can identify areas for improvement, potential vulnerabilities, and opportunities for growth.

STAGE ACTION

2

Once we have analysed your IT environment, it's time to take action. Our skilled technicians will develop a detailed plan that outlines the necessary steps to enhance your IT systems and align them with your business objectives. This could involve implementing new technologies, upgrading hardware and software, optimising network performance, or enhancing data security measures. Our team will work closely with you to ensure a seamless transition, minimising disruption and maximising efficiency.

STAGE ACTIVATE

3

The final stage of our onboarding process is to activate your new IT solutions. Once we have analysed your IT infrastructure and devised a tailored plan, it's time to put that plan into action. Our skilled technicians and engineers will take charge of implementing the recommended changes and configurations. We ensure a meticulous and efficient deployment of the proposed solutions, whether it involves setting up new hardware and software, integrating systems, or enhancing network security measures.
